Forecast Discussion

NWS Detroit/Pontiac · 656 PM EDT Wed Oct 21 2026

- Areas of fog tonight.

- Mild and dry through the week.

&&

.AVIATION...

Extended stretch of dry and stable conditions will continue under general high pressure. This will limit cloud production outside of some passing cirrus tonight and a lower coverage of diurnal VFR cu Thursday. There remains some potential for shallow fog formation late tonight, with greater probability still focused in the vicinity of MBS/FNT around daybreak.

D21/DTW Convection... Thunderstorms are not forecast through the TAF period.

.DTW THRESHOLD PROBABILITIES...

* None.

&&
