Forecast Discussion

NWS Detroit/Pontiac · 1245 PM EDT Sat Oct 17 2026

- Frost headlines now in effect tonight until 8 AM EDT Sunday.

- Below normal temperatures this afternoon with a renewed chance for patchy to widespread frost tomorrow morning.

- Dry weather and above normal temperatures next week.

&&

.AVIATION...

Ridge of high pressure over the central Great Lakes region will continue to sink southward into the Ohio Valley through tonight and Sunday. The subsidence and dry air with this ridge will keep skies clear across most of Southeast MI through Sunday. As the ridge moves across SE MI and into the Ohio Valley, light and variable winds quickly become southwesterly this afternoon and continue into Sunday. A better gradient across the Tri Cities and Flint areas will keep a noticeably stronger wind overnight and allow for some gustiness on Sunday.

D21/DTW Convection...There will be no thunderstorms through the TAF period.

.DTW THRESHOLD PROBABILITIES...

* None.
