Forecast Discussion

NWS Detroit/Pontiac · 653 AM EDT Wed Oct 28 2026

- Mild temperatures return today and continue Thursday with highs in the 70s. These high temperatures are 10 to 15 degrees above normal.

- There is a chance of showers Thursday afternoon and Thursday night.

- Dry and continued mild Friday.

&&

.AVIATION...

Early morning observations indicate a warm front extending eastward from Midwest low pressure to very near the west end of Lake Erie at forecast issuance. Easterly flow just ahead of the front and off the Lake lifted surface Td into the lower 50s at KTOL and KTTF which presents a short time window for MVFR fog/stratus as mid level clouds strip away and before the front moves quickly northward. SW surface wind traces the onset of VFR warm sector conditions under patchy mid and high clouds and late day shallow cumulus. These clouds also exit eastward or dissipate leaving clear sky and mild SW wind this evening. The eastern fringe of mid level clouds associated with the Midwest cold move in late tonight and the cold front approaches the MBS area toward sunrise Thursday.

D21/DTW Convection... Thunderstorms are not forecast through the TAF period.

.DTW THRESHOLD PROBABILITIES...

 * Low for ceiling 5000 ft or less early this morning.
