Forecast Discussion

NWS Detroit/Pontiac · 613 PM EDT Fri Oct 30 2026

- Slightly above normal temperatures into tomorrow.

- Low chance for a isolated light showers late Saturday towards
  central MI.

- Mild early to middle next week.

&&

.AVIATION...

Light and variable winds this evening reorganize out of the
southeast by Saturday morning in response to the departure of
surface high pressure. A steady supply of mid-level moisture keeps
intervals of cloud around tonight through Saturday, based around 7.0
to 10.0 kft agl. The lingering influence of the high resists low
level moisture advection to maintain VFR and light SE flow through
the TAF period.

D21/DTW Convection...Thunderstorms are not forecast through the TAF
period.

.DTW THRESHOLD PROBABILITIES...

* None

&&
