Forecast Discussion

NWS Detroit/Pontiac · 1243 PM EST Thu Nov 12 2026

- Rain showers accompany a cold front tracking north to south today.

- Gusty north wind peaks at 25 to 30 mph this afternoon.

- Lake effect rain/snow showers set up tonight through Saturday. Minor wet snow accumulations are likely across the Thumb, mainly near Saginaw Bay and the Port Huron vicinity.

&&

.AVIATION...

Surface trough continues to sink across lower MI maintaining scattered shower chances through late afternoon. Ceilings remain chaotic ranging from high IFR to lower VFR though the bulk of the area holds under MVFR skies into this evening. Lake effect showers, with some snow potentially mixing in, begin to develop late this evening leading to transient pockets of precip and minor vsby reductions. This is expected to transition into 2 dominant bands, one off Saginaw Bay and southern Lake Huron, by early Friday morning. Within the highest intensity positions of these bands most if not all snow would be the primary p-type. Currently, FNT/DET stand the best shot to be directly downwind so opted for prevailing snow mention- DET likely stays warm enough to allow for a mix rather than all snow. Driving lower level winds being to shift by Friday afternoon directing ongoing lake effect activity east of the terminal corridor towards the St Clair River/southern Ontario.

For DTW... Scattered rain shower chances persist through the remainder of the afternoon before drier conditions return for the evening. Some pockets of light rain are possible late evening, tied to developing lake effect, but low confidence that these track overhead. Main lake effect bands fully form by Friday morning with the closest favored more toward DET. That said, pieces of this activity could break off and reach DTW particularly late morning-early afternoon. Temperatures would be warm enough to support a rain-snow mix in this outcome with minimal if any accumulation.

.DTW THRESHOLD PROBABILITIES...

* High for ceilings at or below 5,000 feet through Friday afternoon.

* High for p-type as rain through 06z tonight. Medium for rain-snow with any precip after 06z into Friday afternoon.
