Forecast Discussion

NWS Detroit/Pontiac · 700 PM EST Sun Nov 1 2026

- Mild and mostly cloudy through the early week.

- Near record warmth and breezy on Tuesday.

- Increasing likelihood for light rainfall on Wednesday.

&&

.AVIATION...

A surface low pivots toward the northern Plains tonight into Monday, sending a warm front and subsequent low level moisture into the Great Lakes Monday afternoon. As this occurs, winds veer from their current southeast direction to the south. A more impactful consequence of this is lowering ceilings, with ceilings reaching MVFR by late afternoon and possibly IFR by 00z which is more likely for southern terminals (DTW/YIP/DET). Current guidance suggests ceilings will lower steadily and most aggressively between about 18z-00z, which is slightly delayed compared to previous runs.

For DTW...Gulf moisture lifts into SE Michigan Monday afternoon, bringing lowering ceilings to DTW. 5.0 kft ceilings are likely by mid-afternoon, with potential for ceilings to drop to low MVFR or IFR by Monday evening.

.DTW THRESHOLD PROBABILITIES...

* High in ceilings aob 5000 ft early Monday afternoon and evening.
