Forecast Discussion

NWS Detroit/Pontiac · 729 PM EDT Thu Oct 29 2026

- There is a chance of showers and isolated thunderstorms this afternoon and evening. No severe weather is anticipated.

- Dry this weekend with temperatures some 7 to 12 degrees above normal.

- Warm conditions with humidity will be possible early to middle next week.

&&

.AVIATION...

Departing cold front is drawing the narrow band of frontal moisture out of the airspace, leaving behind clear skies and veering winds. Stratus plume noted over the Upper Peninsula expands south through the overnight, and will brush the Saginaw Valley early Friday morning. This may initially allow MVFR restrictions to develop, although clears out through the morning as mixing occurs. Light northwest flow then prevails for the day as high cloud streams in from the west.

D21/DTW Convection...Thunderstorms are not forecast through the TAF period.

.DTW THRESHOLD PROBABILITIES...

* Medium for cigs at or below 5000 ft through 02z.

&&
